

The Questions	The Answers
1. What is ionic bonding?	
2. What atom has positive charge?	
3. What atom has negative charge?	
4. Give 3 examples of ionic bonding!	
5. What is ion?	
6. What is the charge of sodium?	
7. What is the charge of chlorine?	

Positive charge
Atom that has charges
NaCl, MgI ₂ , Al ₂ O ₃
Metals atom
Non metals atom
The bonding between non metal and metal atoms
Negative charge
