CATALYST

CONCENTRATION

SURFACE AREA

Aplication	Factor/s affecting reaction rates
The wood used as fuel will be cut into small pieces first so that it is easy to burn	
Nails that are outside the house and exposed to air, heat, and rainwater will rust faster than the surface of nails that are inside the house	
Fruits in the refigerator rot longer than those in the open air	
In the process of making bread, yeast will be added to the dough to make it smooth quickly
