

Cellular Respiration Review

1. What is the main product that is used to power our cells during cellular respiration? _____
2. What two reactants do we take in to produce energy during cellular respiration? _____
3. Which process takes in and stores energy? _____ Which process takes in and releases energy? _____
4. What is the difference between organic and inorganic molecules?

_____

How do we get organic molecules into our body? _____

This helps create what molecule we use for energy? _____

5. What is the difference between aerobic and anaerobic respiration? _____

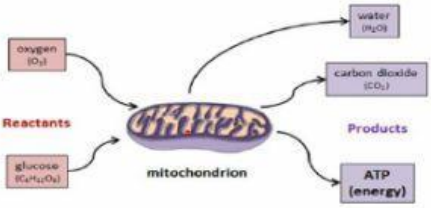

_____

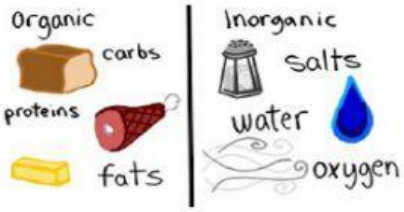

6. Why do your muscles burn after working out for a while? _____

_____
