

# Circulatory System

**Complete the text with an appropriate word or expression:**

The circulatory system takes \_\_\_\_\_ to all parts of the body. It carries \_\_\_\_\_ and \_\_\_\_\_ to all parts of the body and collects \_\_\_\_\_ to be expelled. The circulatory system functions all the time, day and night.

**Tick the correct column:**

	Heart	Veins	Arteries	Capillaries
Blood vessels that return blood to the heart from the rest of the body				
Hollow muscle				
Tiny blood vessels that connect the arteries to the veins.				
It pumps blood around the body.				

<i>It is where the blood delivers nutrients and oxygen to the body's cells and picks up waste products (carbon dioxide...)</i>				
<i>It usually beats 60 to 100 times a minute.</i>				
<i>They have thin walls.</i>				
<i>Blood vessels that carry blood from the heart to the rest of the body.</i>				
<i>It works faster when you are running or you are scared because we need more oxygen.</i>				

**Complete the picture with the correct information:**

Blood enters the right side of the heart through the veins, carrying carbon dioxide.

Blood is pumped through the heart to the rest of the body, delivering oxygen and picking up carbon dioxide

The blood enters the left side of the heart, carrying oxygen

Blood is pumped through the heart to the lungs, where it picks up oxygen and delivers carbon dioxide to be expelled.
