

# Where Do Your Eyes Come From?

1. The colour of our eyes and our hair are family \_\_\_\_\_.

members                    traits                    parts

2. We inherit these traits from our \_\_\_\_\_.

children                    friends                    parents

3. Many people have the same hair colour, but they are \_\_\_\_\_.

different                    familiar                    strangers

4. No other person has got exactly the same \_\_\_\_\_ of traits as you.

combination                    eyes                    hair

5. Are your \_\_\_\_\_ attached to the side of your face?

shoulders                    earlobes                    glasses

6. How do you fold your \_\_\_\_\_?

feet                            fingers                    hands

7. It's \_\_\_\_\_ to look for these traits with your family and friends.

fun                            cool                            terrible
