

Finding Antonym Pairs

Instructions: Use the context clues of the passage to drag and drop a word from the “Context Clue Box” to match its antonym above.

Passage: In the woods most trees are tall but some are short. The tracks in the woods are sometimes narrow however sometimes wide. The trees have strong limbs but some have weak limbs too. On mornings you can see birds flying out of or flying into their nests yet in the nights, you only hear them. There are some handsome animals in the woods, but others are quite ugly. I am always happy but never sad to visit the woods. Some people say they learn little from the woods, however, I know that I learn a lot when I visit the woods.

Match the antonym pairs below:

1. Tall and _____

2. Narrow and _____

3. Morning and _____

4. Handsome and _____

5. Happy and _____

6. Little and _____
