A. I must go now	B. he must go now	C. he had to go r	now D. he had to go then		
Mark the letter A, B, C, D to in	dicate the word(s) CLOSE	T in meaning to the	e underlined word(s) in each of the		
following questions.	50.54				
Question 24: Women are consid	dered to be better suited for	childbearing and hor	memaking rather than for		
involvement in the public life of			Programme and the Control of the Con		
	B. advocate	C. participation	D. recognition		
Question 25: How long will it be					
	B. used up	C. put up with	D. gone out		
	100 Process - 10		the underlined word(s) in each of		
the following questions.	uncute the mora(s) or rot	are in incuming to	are undermied word(s) in each or		
Question 26: One way to prote	ct our environment from not	lution is to reduce wa	asteful consumption		
	B. excessive	C. safe	D. economical		
Question 27: How many people					
	can visit the Galapagos Isla	inds on the coast of t	cuador without arrecting the		
ecological balance?	D. 1-6	C too bline	Di distribute		
	B. influencing	C. troubling			
Find the underlined part amo	ng A, B, C or D that is Wi	ong in English stal	idard		
Question 28: Among us (A) stu	dents are many foreigners (B) whose (C) attend I	anguage classes at the (D) south		
campus.					
Question 29: Women's moveme	ents ensure(A) the full(B) ed	ucation, develop(C)	and advancement of(D) women.		
Question 30: The (A) electric to	paster (B) was one of the ear	rliest appliance (C) to	be developed for the kitchen		
Read the following passage and mark the letter A, B, C, or correct word that best fits each of the					
numbered blanks.					
Earth is the only place we	know of in the universe that	t can support humar	n life human activities are making		
the planet less fit to live on. As the western world carries on consuming two-thirds of the world's resources while half of					
the world's population do so just to stay alive we are rapidly destroying the resource we have by which all people					
can survive and prosper. Everywhere fertile soil is either built on or washed into the sea. Renewable resources are					
exploited so much that they will never be able to recover completely. We discharge pollutants into the atmosphere without					
any thought of the consequences. As a the planet's ability to support people is being reduced at the very time					
when rising human numbers and consumption are increasingly heavy demands on it.					
The Earth's natural resources are there for us to use. We need food, water, air, energy, medicines, warmth, shelter					
and minerals to us fed, comfortable, healthy and active. If we are sensible in how we use the resources, they will					
last indefinitely. But if we use them wastefully and excessively, they will soon run out and everyone will suffer.					
Question 31. A. Although	B. Still	C. However	D. Eventually		
		C. lone			
Question 32. A. alone	B. individual		D. only		
Question 33. A. development		C. reaction	D. product		
Question 34. A. doing	B. having	C. taking	D. making		
Question 35. A. hold	B. maintain	C. keep	D. stay		

Read the passage and choose the best option A, B, C or D for each question

The search for alternative sources of energy has led in various directions. Many communities are burning garbage and other biological waste products to produce electricity- Converting waste products to gases or oil is also an efficient way to dispose of wastes. Experimental work is being done to derive synthetic fuels from coal, oil shale, and coal tars. But to date, that process has proven expensive. Other experiments are underway to harness power with giant windmills. Geothermal power is also being tested. Some experts expect utility companies to revive hydroelectric power derived from streams and rivers. Fifty years ago hydroelectric power provided one third of the electricity used in the United States, but today it supplies only 4 percent. The oceans are another potential source of energy. Scientists are studying ways to convert the energy of ocean currents, tides, and waves to electricity. Experiments are also underway to make use of temperature differences in ocean water to produce energy.

Question 26: What is the best title of the passage?		
A. The Use of Water Products for Energy	B. The Search for Alternative Sources of Energy	
C. Efficient Ways of Disposing of Waste	D. New Discoveries in Geothermal Power	
Question 27: What provided one third of the electricity in the U	United States fifty years ago?	
A. wind B. waste products	C. water D. oil	
Question 28: What could replace the phrase 'geothermal power	er' in the passage?	
A. heat from the earth	B. gases in the earth's atmosphere	
C. steam that shot up out of the earth	D. water in the ocean, lake, or river	
Question 29: Which of the following is not mentioned in the pa	40 M. T. C. C. C. L. C. L. C.	
A. Burning of garbage B. Geothermal power	C. Synthetic fuels D. Electricity	
Question 30: According to the author, what is the impracticable energy due to?	lity of using coal, oil shale and coal tars' as sources of	
A. They take a lot of time	B. They are expensive	
C. They are non-renewable resources	D. They are scarce resources	
Give the correct form of the words given		
Question 41: Our organization is going to organize an event al	bout protecting the environment in our city and we need	
more to help us now. (participate)
