You can press the horizontal lines icon on the upper right corner then press "Settings" at the bottom

How To Make Your Account Private on Instagram

If a notification shows up, just read it and click OK to complete the process.

After the dialog settings has opened, scroll down to locate Private account then click the button to enable it.

After the login process is completed, you can press the "Person" icon on the bottom right corner to go to your profile account.

Open your instagram application on your smartphone

Complete your login or sign up processes.
