7. You can pay some robot waiters with your credit card (True – False)

2. Read the comprehension and answer the questions below:

Some robots go to places where it is hard or impossible for people to go. They take photos, measure things or collect samples for scientists to study. Robots with wheels have explored the moon and planet Mars. Some robots go deep into the ocean to explore plants and animals that live there. They also search for old ships on the ocean floor. Other robots can go into dangerous places where there have been fires, earthquakes or explosions. Robots can search for people to rescue. They can find people and send us information. They can move walls or things that fall.

Some robots do jobs that are repetitive. They make cars and other things in factories. They are often faster and

stronger than people, especially when they make big or heavy things.
