

Resuelva los siguientes ejercicios de adición, sustracción, multiplicación y división

$$\begin{array}{r} 79435 \\ + 39906 \\ \hline \end{array}$$

$$\begin{array}{r} 50000 \\ - 29871 \\ \hline \end{array}$$

$$\begin{array}{r} 9435 \\ \times 6 \\ \hline \end{array}$$

$$\begin{array}{r} 2435 \\ \times 39 \\ \hline \end{array}$$

The diagram shows the multiplication of 2435 by 39 using a grid method. The grid is 5 columns wide and 2 rows high. The top row contains 5 yellow squares, representing 5 tens. The bottom row contains 3 yellow squares, representing 3 tens. The left column contains 4 yellow squares, representing 4 tens. The right column contains 2 yellow squares, representing 2 tens. The middle column contains 3 yellow squares, representing 3 tens. The grid is divided into four quadrants by a vertical and horizontal line through the center.

$$\begin{array}{r} 59435 \\ \hline \end{array} \quad \left| \begin{array}{r} 9 \\ \hline \end{array} \right.$$

The diagram shows the division of 59435 by 9 using a grid method. The dividend 59435 is shown above a vertical line. To the right of the vertical line is a quotient box with a 9 at the top. Below the vertical line is a divisor box containing 9 green squares arranged in a 3x3 grid. The dividend is represented by a grid of 5 columns and 7 rows of green squares. The first two columns of the dividend grid are aligned with the first two columns of the divisor grid. The third column of the dividend grid is aligned with the third column of the divisor grid. The fourth column of the dividend grid is aligned with the fourth column of the divisor grid. The fifth column of the dividend grid is aligned with the fifth column of the divisor grid.

$$\begin{array}{r} 9756 \\ \hline \end{array} \quad \left| \begin{array}{r} 8 \\ \hline \end{array} \right.$$

The diagram shows the division of 9756 by 8 using a grid method. The dividend 9756 is shown above a vertical line. To the right of the vertical line is a quotient box with an 8 at the top. Below the vertical line is a divisor box containing 8 purple squares arranged in a 2x4 grid. The dividend is represented by a grid of 4 columns and 3 rows of purple squares. The first two columns of the dividend grid are aligned with the first two columns of the divisor grid. The third column of the dividend grid is aligned with the third column of the divisor grid. The fourth column of the dividend grid is aligned with the fourth column of the divisor grid.
