

Network	LAN, WAN or the Internet?
 <p>The diagram illustrates a Local Area Network (LAN). It features five computer icons: an IBM Compatible desktop, an iMac, a Server tower, a Laptop computer, and another IBM Compatible desktop. All five computers are connected to a central horizontal blue bar labeled "Ethernet".</p>	
<p>This type of network lets your teacher save their Computer Science files to OneDrive.</p>	
 <p>The diagram illustrates a Wide Area Network (WAN). It shows two computer icons, one at the top and one at the bottom, each enclosed in a yellow circle. They are connected by a green line that passes through a globe in the center, representing a global network like the Internet.</p>	
<p>Cash machines throughout the UAE for a bank are connected to this network.</p>	
<p>You can play an online game against someone in Mexico using this type of network.</p>
