2 Match choices (A—H) to (1—5). Three choices are extra.

1) Dog-to-Human Language Translation Device

Keita Sato invented Bow-Lingual, a computer-based automatic dog-to-human language translation device. The Bow-Lingual's a two-piece set — a wireless microphone that attaches to your dog's collar, and a walkie-talkie-looking handset with an LCD screen. Barks and yelps are transmitted to the handset, where their voiceprint is analyzed and placed into one of six emotional categories: happy, sad, on guard, frustrated, needy, or assertive. This invention _____

2) Alarm Clock that Runs Away from You

Gauri Nanda (Massachusetts Institute of Technology) invented «Clocky», an alarm clock that runs away and hides if you don't get out of bed on time. When the alarm sounds you can snooze one time. If you still don't wake up, «Clocky» will jump off of the bedside table, and wheel away, mindlessly bumping into objects until he finds a spot to rest. You'll have to get up and out of bed to silence his alarm. This invention _____

3) Washing Machine for Cats and Dogs

The co-inventors of the Lavakan, Eduardo Segura and Andrés Diaz, decided in 1998 that their dogs deserved the same treatment that humans get from a shower massage. The side-loading automatic pet washing machine is safer and less stressful for the animals than washing them by hand. It soaps, rinses and dries dogs and cats in less than half an hour. This invention _____

4) Self-Perfuming Business Suit

Hyuk-ho Kwon of Kolon Company of Seoul, Korea, invented this suit. The suit is made with fabric soaked in a chemical that contains scented micro-capsules, which pop and release the odour when the wearer moves — or gets bumped on a crowded subway train. This invention _____

5) Automobile Burglar Alarm Consisting of a Detection Circuit and a Flamethrower
 Charl Fourie and Michelle Wong from South Africa invented an automobile burglar alarm consisting of a detection track and a flamethrower, to provide a deterrent to carjackings. The Blaster car modification functions as a liquified petroleum gas flamethrower; when a carjacking occurs, the driver steps on an additional pedal next to the accelerator and flames erupt from the outer sides of both front doors, «neutralizing» the attacker. This invention _____

- A) was created in order to defend drivers from hijackers.
- B) can be used to soap, rinse and dry dogs and cats.
- C) helps protect your computer from cats.
- D) should be implanted years afterwards in most cases.
- E) can escape from you.
- F) is a two-piece set.
- G) smells nice.
- H) can help to understand dogs barking and yelping.
