CLASSIFYING TRIANGLES

Name: _____   Class: _____

Classify the triangles based on the <u>length of their sides.</u>
Each triangle will be one of the following types:

- **Equilateral:** all sides are equal in length.
- **Isosceles:** two sides are the same length.
- **Scalene:** all sides are different lengths.

11   7   6

5   5   5

_____   _____

10   13   9

9   8   8
