

Hodnota výrazu 1

Nejprve do výrazu dosadíte za proměnné a pak určete hodnotu výrazu:

$$a = -2 \qquad 4. a - 6 \qquad = 4. \quad - 6 \qquad =$$

$$b = 3,5 \qquad 7. 2 - 3. b \qquad = 7. 2 - 3. \qquad =$$

$$c = -5 \qquad c^2 - 3.c \qquad = \quad ^2 - 3. \qquad =$$

$$x = \frac{1}{2} \qquad 5. x - 0,5 \qquad = 5. \quad - 0,5 \qquad =$$

$$a = -4, b = 3 \qquad - a - b = \qquad = - \quad - \qquad =$$

$$x = 1, y = 2 \qquad 3. x - 2. y = \qquad = 3. \quad - 2. \qquad =$$

$$k = 1,2, m = 0,4 \qquad k^2 + 2.k - m \qquad = \quad ^2 + 2. \quad - \qquad =$$

$$a = \frac{1}{3}, b = \frac{1}{4} \qquad 3. a - 2. b \qquad = 3. \quad - 2. \qquad =$$

$$b = -\frac{3}{4} \qquad 4. b^3 + 2. b^2 - 1 = 4. \quad ^3 + 2. \quad ^2 - 1 =$$
