

How many?

LET'S MAKE IT A LITTLE MORE DIFFICULT!

$$\text{astronaut} + \text{mars} = \square$$

$$\text{saturn} + \text{spaceship} = \square$$

$$\text{rocket} + \text{moon} = \square$$

$$\text{sun} + \text{planet} = \square$$

A LITTLE MORE!

$$\text{saturn} - \text{sun} = \square$$

$$\text{moon} - \text{spaceship} = \square$$

$$\text{mars} - \text{astronaut} = \square$$

$$\text{planet} - \text{rocket} = \square$$
