

SUMA Y RESTA DE FRACCIONES HETEROGÉNEAS POR EL MÉTODO DE IGUALACIÓN

$$\frac{3 \boxed{}}{4 \boxed{}} - \frac{3 \boxed{}}{6 \boxed{}} = \frac{\boxed{} - \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{1 \boxed{}}{2 \boxed{}} + \frac{5 \boxed{}}{3 \boxed{}} = \frac{\boxed{} + \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{3 \boxed{}}{5 \boxed{}} + \frac{2 \boxed{}}{6 \boxed{}} + \frac{1 \boxed{}}{10 \boxed{}} = \frac{\boxed{} + \boxed{} + \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{4 \boxed{}}{9 \boxed{}} + \frac{1 \boxed{}}{3 \boxed{}} + \frac{5 \boxed{}}{2 \boxed{}} = \frac{\boxed{} + \boxed{} + \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$
