MUSIC IN OUR LIFE

People cannot live without music. We can hear music everywhere: in the streets and at home, over the radio and on TV, in the shops and in the parks. People all over the world are fond of music. They listen to music, they dance to music, they learn to play musical instruments.

Music can be classical and modern. Classical music is performed by symphonic orchestras in great halls. There are a lot of famous composers whose music is played nowadays. Classical music is serious and that's why it may seem to be boring and dull for someone.

Most young people prefer modern music. Modern music is performed on TV and radio. Modern music has different genres: pop, rock, disco, rap, techno and others. Most young people like dance and pop.

Older people are fond of jazz, rock and pop. There are a lot of singers and music bands who perform this or that kind of music. Now there are a lot of discs and records of different performers.

People like to watch clips because it's not only listening to music but also watching interesting things. I'm fond of music and like to listen to it because it helps me to have good relaxation.
