Match up the word with its definition.

Adapted	Scientific word for babies!
Genes	Change in a species over a very long period of time
Charles Darwin	When all of a species has died out
Evolution	The “father” of evolution - the scientist who first came up with the theory
Extinct	Well-suited to an environment or lifestyle
Offspring	We inherit these from our parents and they code for our characteristics e.g. eye colour

Challenge: what might happen to a species if it wasn’t **well adapted** to its environment? Why?
