When I grow up, I want to be a vet, because I like animals. My favourite subject is Biology and I often go to Natural Museum and the zoo near my home.

When I leave school, I think I'll go to university and I'll learn how to cure animals. Later I think I'll work at London Zoo.

I don't want to get married too soon, so I think I'll wait until I'm thirty. I hope my partner will be a kind, friendly and handsome man. I don't want to be rich or famous, but I want to be important and happy. I think I'll live in a big city.

I don't think that the world will change very much. We'll probably have electric cars and very clever computers.

I hope we won't have wars and diseases. Life will be easier and people will live longer. We'll take care nature and animals.

Yes, children will still go to school, but schools will be very different. There will still be teachers, but computers will teach some lessons. Some students will stay at home and learn in virtual classrooms. Virtual reality will give them an image of a classroom in three dimensions – or 3D. They will see their teacher and their friends, so they will feel like they are really at school.

**Will computers understand what we say to them?**

Computers will be more intelligent. They will understand what we say, what we think and how we feel. In the future, humans and computers will be part of a huge radio network. We will send messages from our brain to our computer and the computer will send messages straight to our brain, without using wires. When you want to learn something new, your computer will send the information straight to your brain.
