II. READING (2 points)

Task 1. Read the text about recycling. Circle the best answer A, B or C.

Recycling is beneficial. First, recycling means less trash, so it saves space in landfills. Second, if we use materials again, we can take fewer resources from the Earth. Third, recycling materials produce less pollution, so it helps to keep our environment clean.

So what can you do? Be sure to recycle everything you can at home and school. Always drop your used aluminum cans and plastic bottles in a recycling bin. Remember to put paper items like the newspaper, cereal boxes, and homework pages into the recycling bin, too. Besides, find creative ways to reuse old items before throwing them away.

Here are some fun facts about recycling. Old paper can be recycled around seven times. Glass is one of the best recycling materials. Clear glass can be recycled over and over again. In 2009, the United States recycled around 30% of all its waste and they found ways to recyle around 7 million tons of metals.

1. What is NOT a benefit of recycling?

   A. It helps to protect the environment.

   B. It saves the Earth's resources.

   C. It makes landfills safer places.

LIVEWORKSHEETS

2.What can you drop in the recycling bin?

A.Glass bottles.

B. Paper worksheets.

C. Old cereal.

3.Which is the best recycling material?

A.Metal.

B. Old paper.
