Social Science. Unit 5. The space

Why is so important the space?

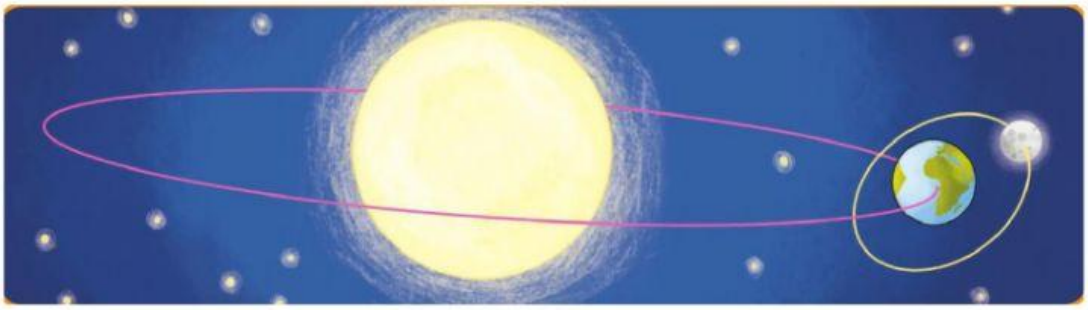

We live in the Earth.

We can see the sun during the day. At night we can see the moon and lots of stars.

The sun

The sun is a star. The sun is the centre of the Solar System (and there are eight planets in the Solar System)

The sun gives us light and heat.

The Earth

The Earth is a planet. The Earth goes round (orbits) the sun.

It takes one year for the Earth to move around the sun. There are 12 months and 4 seasons in a year.

The moon

The moon is a satellite. It is made of rocks and it has craters. It is round, but sometimes we only see a part of it. There is no water on the moon.

The moon orbits the Earth.

1. Look at the pictures. Look at the letters. Write the words

			
utamn	smmeu	rtiwne	gprsni

2. Write one-word answer:

a. What is the centre of the solar system? The _____

b. What planet can you see in the picture? The _____

c. What does the moon orbit? The _____

3. Read and write Yes or cross No:

The moon orbits the Earth. ☐ The Earth orbits the sun. ☐

4. Write the correct answer:

There are _____ months in a year.
