

## SCIENCE REVIEW P34-41

I/ CHOOSE THE CORRECT ANSWER.

1. Where does salt come from?  
a. the sea                      b. beaches                      c. rocks on land                      d. rivers
2. Fill in the blank: “\_\_\_\_\_ wash salt into the sea”  
a. the sea                      b. beaches                      c. rocks on land                      d. rivers
3. Salt comes from the rocks at the \_\_\_\_\_ of the sea.  
a. bottom                      b. middle                      c. front                      d. top
4. Which of the following is dug under the ground?  
a. sugar                      b. salt                      c. pepper                      d. sunlight
5. Salt and sugar \_\_\_\_\_ in water.  
a. disposes                      b. stirs                      c. dissolves                      d. dissolves
6. When chocolate is heated, what happens to it?  
a. it melts                      b. it smells                      c. it cools down                      d. it becomes solid
7. When we put water into the freezer, what happens to the water?  
a. it becomes a gas                      b. it becomes hot.                      c. it becomes a liquid                      d. it becomes ice
8. Where does light come from?  
a. the sea                      b. the dark                      c. a light source                      d. the window

9. Which of the following can be a light source?

- a. a book                      b. a ruler                      c. a bulb                      d. a board

10. Which of the following cannot be a light source?

- a. the Sun                      b. the Moon                      c. The stars                      d. the light

11. Darkness is when there is \_\_\_\_\_ light

- a. little                      b. much                      c. many                      d. a lot of

12. We cannot see \_\_\_\_\_ some light.

- a. with                      b. without                      c. in                      d. over

13. Which of the following does the Moon reflect light from?

- a. the sea                      b. lights                      c. lands                      d. The Sun

II/ WRITE T (TRUE) OR F (FALSE)

1. A torch cannot be a light source.                      \_\_\_
2. Salt comes from the sea and Ocean.                      \_\_\_
3. Rivers wash the salt into the sea.                      \_\_\_
4. We cannot see anything when there is no light.                      \_\_\_
5. Shadows always have colors and items.                      \_\_\_

### III/ FILL IN THE BLANKS

## Sun, torch, make, reflect, not, Moon, light

These objects are  light sources. They do not make light.

Some objects  light. The light bounces off them.

The  reflects light from the . Water and mirrors reflect light.
