

Sciences review:

People and machines

1. What different things do we use machines for?

2. What machine in your home helps you most?

3. Which is safer?

4. Write True or False:

- a) Workers on a construction site must wear special clothes.
- b) Anyone can drive a car.
- c) Workers must protect their ears when working with chemicals.
- d) Loud machines, like road drills, can be bad for your ears.
- e) Rubber is a conductor.
- f) Human bodies can conduct electricity.

5. Where these machines help us? Drag the drawings:

At home	Transport	Communication	Enjoying our free time
---------	-----------	---------------	------------------------

			
			
			

6. Complete the text with the following words:

Conductors / insulators / flows / powerful / electricity

Be safe with electricity

Electricity _____ through metals, water, trees and people. These materials are _____. Other materials, for example, plastic, glass and rubber, block the flow of electricity. They are _____.

Electricity is very _____. Your body is a conductor. If _____ goes through your body, it can kill you.

What should you do? What shouldn't you do?
