In each part choose the sequence word that best completes the sentence.

(First / Secondly), paste the figures you want on what will be the base of the diorama. (Second / Following), wrap a thick plastic sheet around it and glue it to the base. This will be the mold for the resin. (Third / Finally) combine the two parts of the resin in a plastic or ceramic cup. Make sure the mold doesn't leak (before / after) you finally pour the resin into it. (The next part / The previous part) are the final touches, but you need to let it dry for 24 hours before you do that.
