_____.
- i) When man transforms materials into something else, we call this
_____.
- j) We re-use materials through a process called
_____.

[TOTAL 10]

Activity four

Design a poster for the answer you used in 2j.

[TOTAL 5]

Complete this using a full page in your workbook. The layout can be landscape or portrait. You must use the full page. Remember a good poster has a balance of words or pictures and focuses on bringing the information across.

Activity five

Fill in the missing word/s.

- a) When we add certain things to steel, we create a new type of steel called _____ steel (this is often used to make taps).
- b) This new type of steel does not _____.
- c) We can combine flour and water over heat to make _____.
- d) Jelly sets when we put it in the _____.
- e) The special ingredient in jelly that helps it to set is called _____.
- f) We add _____ to clay to help us mould it into a shape.
- g) The special oven where we bake clay is called a _____.
- h) We apply a _____ to clay to make it last longer.
- i) We _____ building materials to make them stronger.
- j) Cement is made stronger by adding _____ to it.

[TOTAL 10]

Activity six

Draw a flow diagram of the process for making jelly.

[TOTAL 5]
