

NOMBRE: _____

RESUELVE EL PROBLEMA

CARLA SE QUIERE HACER *DOS TATUAJES*. UN **SOL** QUE CUESTA **5 EUROS** Y UNA **LUNA** QUE CUESTA **3 EUROS**. ¿CUÁNTO DINERO SE VA A GASTAR EN TOTAL?

The diagram illustrates the problem with visual aids. A sun icon is positioned above a square box, representing the cost of the sun tattoo. Below this box are five 1 Euro coins, indicating a total cost of 5 Euros. A plus sign is placed between the two boxes. To the right, a moon icon is positioned above another square box, representing the cost of the moon tattoo. Below this box are three 1 Euro coins, indicating a total cost of 3 Euros. An equals sign follows, leading to a final empty square box for the total cost.
