

PROF. MIGUEL SIERRA

## MULTIPLICACIONES DE DOS CIFRAS

✓ Ejercitación de multiplicación por dos cifras:

Nota: no se olvide de colocarle el punto de mil a las cantidades que amerite.

$$\begin{array}{r} \times \\ 25 \\ 22 \\ \hline \end{array}$$

Diagram: A multiplication problem with 25 and 22 as factors. The product is represented by a 4x4 grid of blue squares, with a '+' sign at the bottom left and an 'x' sign at the top left.

$$\begin{array}{r} \times \\ 58 \\ 12 \\ \hline \end{array}$$

Diagram: A multiplication problem with 58 and 12 as factors. The product is represented by a 4x4 grid of blue squares, with a '+' sign at the bottom left and an 'x' sign at the top left.

$$\begin{array}{r} \times \\ 12 \\ 15 \\ \hline \end{array}$$

Diagram: A multiplication problem with 12 and 15 as factors. The product is represented by a 4x4 grid of blue squares, with a '+' sign at the bottom left and an 'x' sign at the top left.

$$\begin{array}{r} \times \\ 37 \\ 36 \\ \hline \end{array}$$

Diagram: A multiplication problem with 37 and 36 as factors. The product is represented by a 4x4 grid of blue squares, with a '+' sign at the bottom left and an 'x' sign at the top left.

$$\begin{array}{r} \times \\ 46 \\ 27 \\ \hline \end{array}$$

Diagram: A multiplication problem with 46 and 27 as factors. The product is represented by a 4x4 grid of blue squares, with a '+' sign at the bottom left and an 'x' sign at the top left.

$$\begin{array}{r} \times \\ 78 \\ 54 \\ \hline \end{array}$$

Diagram: A multiplication problem with 78 and 54 as factors. The product is represented by a 4x4 grid of blue squares, with a '+' sign at the bottom left and an 'x' sign at the top left.

$$\begin{array}{r} \times \\ 53 \\ 64 \\ \hline \end{array}$$

Diagram: A multiplication problem with 53 and 64 as factors. The product is represented by a 4x4 grid of blue squares, with a '+' sign at the bottom left and an 'x' sign at the top left.
