ICHTHUS SCHOOL

Grade 2 Science Name:_____

Water Cycle -drag and drop!

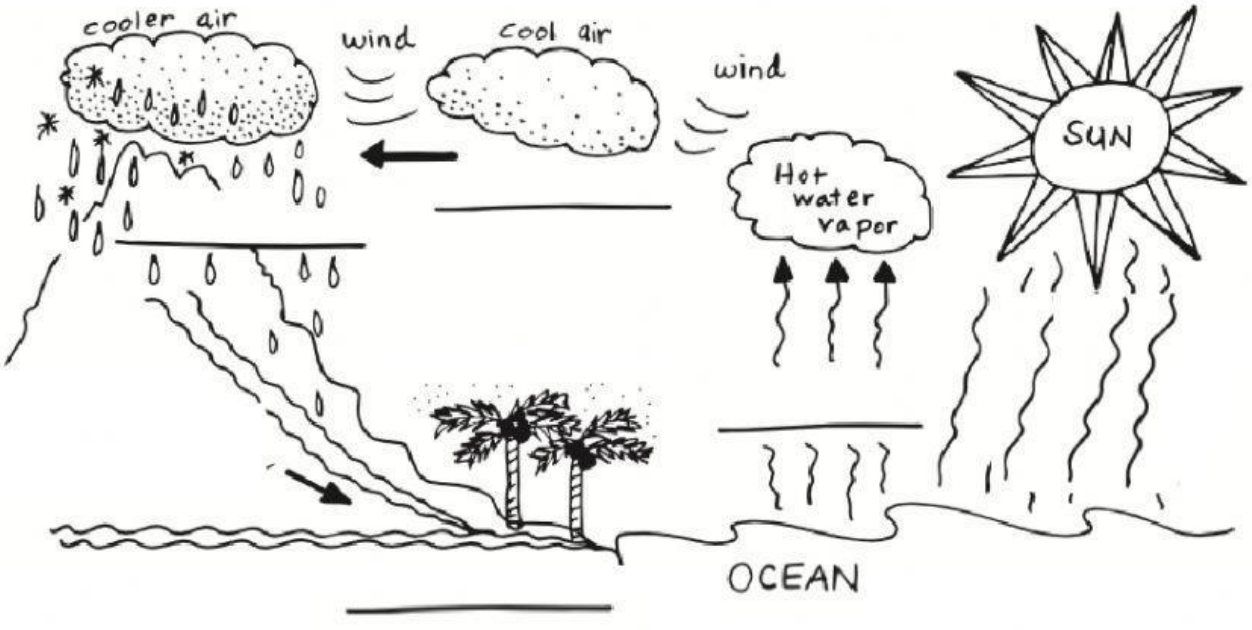

A. Complete the table below!

Water Cycle	Precipitation	Evaporation	Condensation

		When water on land is heated up by the sun and the water turns from a liquid to a gas in the air.
		When evaporated water goes into the atmosphere and cools down.
		When the cloud gets too heavy with water droplets and it falls as rain.
		Water moves continuously from Earth's surface into the air and back to the earth's surface again.

B. Complete the picture below!

Accumulation	Precipitation	Evaporation	Condensation
