**Part 7 / Read the following passage and decide if the statements that follow are TRUE or FALSE.(1m)**

Energy is very important in modern life. People use energy to run machines, heat and cool their homes, cook, give light, transport people and products from one place to place. Most energy nowadays come from fossil fuels : petroleum, coal, and natural gas. However, burning fossil fuels causes pollution.

Also, if we don't find new kind of energy, we will use up all the fossil fuels in the twenty-first century. Scientists are working to find other kinds of energy for the future. What might these sources of energy be?

- 1/ Energy isn't used to cool their homes.
- 2/ Fossil fuels are limited.
- 3/ Air pollution comes from the burning of fossil fuels.
- 4/ Scientists aren't doing research into alternative energy sources.
