

ACTIVITY 2:

Biological weathering happens when tree roots grow inside cracks of rocks, splitting rock cracks more and breaking the rock.

Biological weathering
breaking
splitting
tree roots

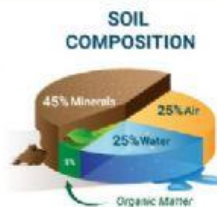

1.

happens when

grow inside cracks of rocks,
rock cracks more

and the rock.

Soil is made of minerals
organic matter, water,
and air. 45% of soil
consists of minerals.

organic matter

water, and air.

45% of soil

Soil

minerals

2.

is made of

,

consists of minerals.
