More About Forces

friction.

Gravitational force

An **object** has **mass**,

slow down or **stop**

[ ] is the force of attraction between two objects. [ ] which is the amount of matter it contains. The larger the mass of the objects and the closer they are to each other, the larger the gravitational force between them.

[ ] is the force which opposes motion when two surfaces are in contact. Friction can [ ] moving objects. A rolling football slows down and stops after some time because of friction between the surface of the ball and the surface of the grass.
