Human Body

I take and absorb the nutrients that your body needs from your food, and I put it in your bloodstream so your body can use it. What am I? _____

I am a tube in your throat. When you swallow, food or drink travels down through me into your stomach. What am I? _____

I am a muscle located behind your lungs. I am always moving, and I never get tired. I pump blood to all parts of your body. What am I? _____

I am sometimes called your "windpipe." When you breathe, air travels through me to your lungs. What am I? _____

When you eat, I mix your food with chemicals made by your body, then I churn up your food into smaller parts. What am I? _____

Your body can't use every part of the food you eat. The waste comes to me, and I dry it out so it can leave your body. What am I? _____

We take oxygen that your body needs from the air and put it in your bloodstream. We also take carbon dioxide that is in your blood and send it out of your body. What are we?

_____
