

## Module-2 Animal—Life Cycle

Name-----

- Which is not an example of a salamander's life cycle?
  - egg hatches
  - loses its gills and grows lungs
  - returns to the water to lay eggs
  - has live babies
- Compare the butterfly life cycle to the grasshopper life cycle? How are they the same?
  - Both animals fly.
  - Both animals start out as eggs.
  - Both animals hang from tree branches.
  - Both animals hop.

- After a fish egg hatches, it \_\_\_\_\_.
  - goes through a metamorphosis
  - looks like a small version of its parents
- Which animal has a life cycle most like a chicken's life cycle?
  - Dog
  - Bear
  - horse
  - turtle

- When does a life cycle end?
  - never
  - when the organism dies
  - when the organism reproduces
  - when the organism grows
- Which is the second stage in a ladybug's life cycle?
  - Adult
  - egg
  - larva
  - pupa

7. An animal that goes through metamorphosis starts life as an\_\_\_\_\_.

- A. baby
- B. egg
- C. adult

8. Compare the rhino beetle and ladybug life cycle. How are they different?

- A. The ladybug and rhino beetle both start as eggs.
- B. The ladybug has a molt stage, and the rhino beetle does not.
- C. The rhino beetle and the ladybug both go through a larva stage.
- D. The rhino beetle eats leaves and the ladybug does not.

9. How does a frog start its life?

- A. as a tadpole
- B. as a larva
- C. as an adult
- D. as an egg

10. Which animals do not undergo metamorphosis during its life cycle? Select **all** that apply.

- A. Cat
- B. frog
- C. snake
- D. beetle

11. When an insect hatches from an egg it is called-----.

- A. Larva
- B. Pupa
- C. Baby
- D. Seed

12. After \_\_\_\_\_ hatches, it usually goes through a metamorphosis.

- A. a fish
- B. a reptile
- C. an insect

13. Which statement best describes metamorphosis?

- A. Eggs hatch.
- B. Body forms change.
- C. Animals die.
- D. Animals feed young.

14. An animal that goes through a metamorphosis changes \_\_\_\_\_ as it grows.

- A. species
- B. shape

15. Different types of animals have different life cycles. Animal life cycles can be predicted and compared because they follow a \_\_\_\_\_.

- A. Pattern
- B. Patterns

16. Which animal does not hatch from an egg?

- A. Owl
- B. Firefly
- C. Ladybug
- D. Bear
