

Here are instructions on how to grow a terrarium. Unfortunately, they are not arranged in the right order. Rearrange the sentences in the correct sequence.

1. Press the roots down into the soil.
2. Make small holes in the soil layer for your plants.
3. Line the bottom of the container with pebbles.
4. Use a spoon to shovel the planting soil into the container.
5. Spread a layer of moss on top of the layer of pebbles.
6. Use a pair of tweezers to arrange the plants.
7. You do not have to water your plants often.
8. Clean the glass once every two weeks with a soft brush.
9. Cover the container with a lid.
10. Only water it when condensation no longer forms inside of the container.
