NOMBRE DEL ALUMNO: _____ **CLAVE:** _____

INSTRUCCIONES: Deberá arrastrar el nombre de cada una de las partes del volcán al lugar correspondiente.

Cráter Lava Cono volcánico Chimenea Ceniza Magma

The diagram shows a cross-section of a volcano. At the top, a large plume of white ash and smoke rises from a central opening. The main body of the volcano is a conical shape. Lava flows are shown on the slopes and at the base. Below the ground level, a central conduit leads to a magma chamber. Six empty rounded rectangular boxes are connected to different parts of the volcano by thin lines, intended for the student to drag the labels from the top row to these boxes.
