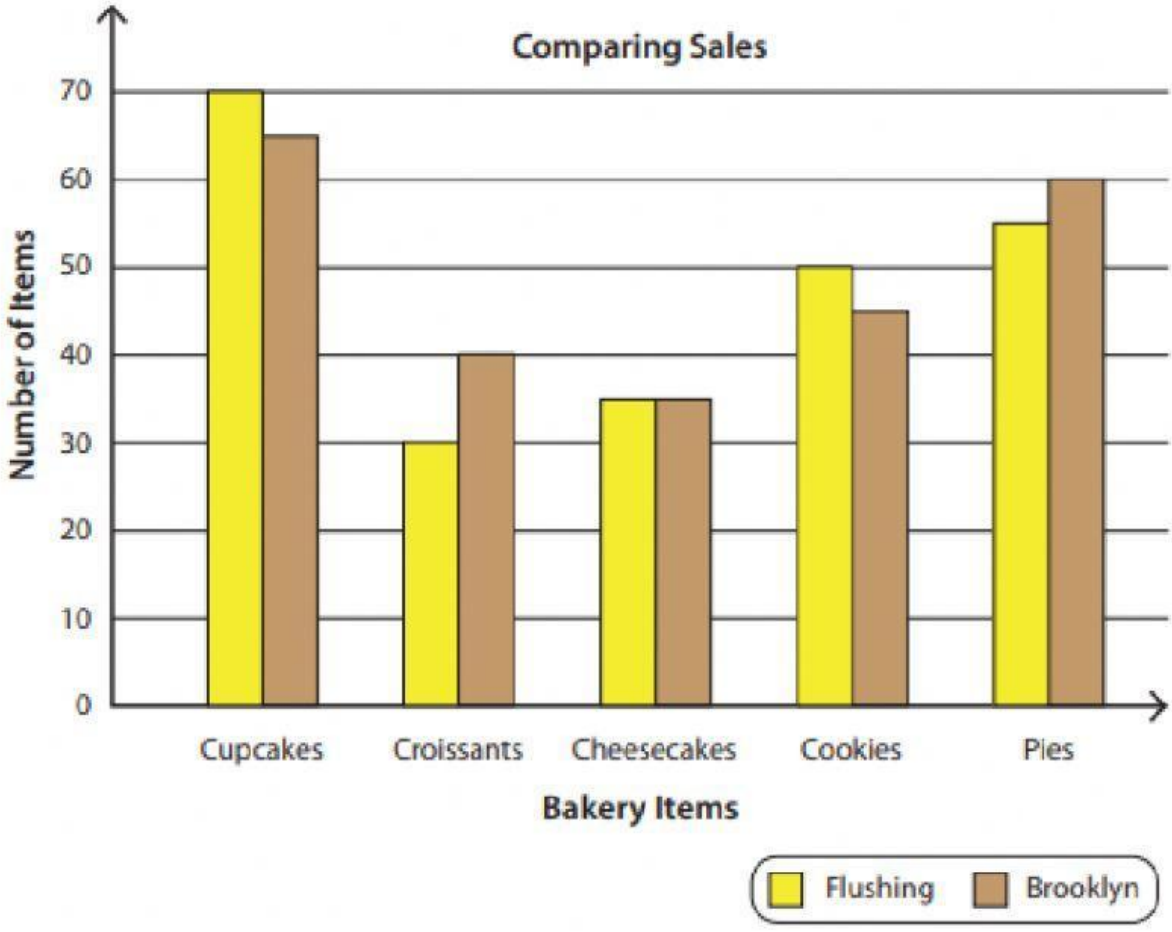
Single and Double Bar Graphs

Double Bar Graph | Comparing Sales

Mrs. Saunders owns bakery stores in Flushing and Brooklyn. She compares the sales of both the stores and records the information in a bar graph. Use the bar graph and answer the questions.



1) How many pies were sold by the bakery store in Flushing? _____

2) Which item was most popular among the customers? _____

3) How many cheesecakes were sold by both the stores? _____

4) Which store sold the least number of croissants? _____

5) How many more cookies were sold than cheesecakes at the store in Brooklyn? _____
