#### A Introduction

The new year is the most popular time for many people to think about what they eat and to try to be healthier. However, it is not always easy to change what you eat and many people give up their healthy diet after just a few weeks. Only a small number of people manage to lose weight. Here is some advice to help you continue your diet, and to feel healthier and happier.

#### B Healthy snacks

Most of us get hungry in between meals, especially after a busy day at work or college. A lot of people will eat the first thing they can find and this is often something not so healthy, like a bar of chocolate or some biscuits. To avoid eating these unhealthy snacks, cut up some fresh fruit and vegetables and keep them in the fridge for when you are feeling hungry. Dried fruit and nuts are also healthy snacks and will hopefully stop you from eating chocolate or biscuits when you feel like eating something sweet. Many people enjoy drinking tea or coffee with sugar, even in the evenings before they go to bed. Try to drink herbal teas, which are healthier and which will help you to sleep better at night.

### C Eating in restaurants

Many people think that if they are following a healthy diet, they shouldn't go out for dinner. However, it is possible to eat healthy food in a restaurant. When you get the menu, look for healthy dishes which come with a lot of vegetables. If you are not sure how healthy a dish is, you can always ask the waiter to help you to choose something. You should also try not to order dessert, or choose something healthy, like fruit. Finally, drink water with your meal. Fizzy drinks and juices contain a lot of sugar.

### D Cooking at home

It is good to cook at home when you are following a healthy diet, because then you will know exactly what you are eating. Avoid buying ready-made meals, because they usually have a lot of salt and sugar. You can make your cooking healthier by using less sugar, oil and salt. Instead, use herbs and spices to give your dishes more flavor. When you cook meat or fish, try to grill or boil it rather than frying. Always include plenty of fresh, steamed or boiled green vegetables as part of your meal. You may find it useful to buy a cookery book of healthy recipes, or to look up healthy recipes online. Finally, remember it's better to avoid having a second serving. If you still have food left, save it for the next day!

**Exercise 4: Read Luke's email to his friend, Andrew. Then complete the exercise.**

Dear Andrew,

Happy New Year! I hope that you enjoyed the party you told me about in your last email. Do you have any good plans for the new year? I have decided that I am going to be much healthier this year. Last year, I had a lot of exams, so I didn't do very much exercise, and I ate too much chocolate and too many biscuits. This year, I want to follow a healthy diet and to do more exercise.

I joined a gym last week. It's in a nice new sports center, which has a swimming pool and different rooms with a variety of exercise classes. I tried the yoga class last week and I really enjoyed it. I am going to go to a class once a week, and to the gym twice a week. I think that this will help me to get fit very quickly. I have also started to walk to college instead of taking the bus. When I go to the library, I go by bike because it is quite far. I feel much better and less tired if I walk or cycle.

I have started to cook more meals at home. I have found some good healthy recipes on the internet. Last night, I cooked baked fish with steamed vegetables. It was delicious, and I didn't feel hungry at all afterwards. I have also decided not to eat junk food like chocolate and crisps for one month. I take dried fruit and nuts to college with me as a snack, and I eat fruit or yoghurt in the afternoon instead of biscuits or cake. The next time I see you, I promise to cook you something healthy.

Look forward to hearing from you soon!

Best wishes,

Luke

## **Exercise 5: Read an essay about young people's lifestyles. Then complete the exercise.**

How healthy are young people's lifestyles today? What can they do to be healthier?

Today, many young people have busy lives at school and at home. Most teenagers today spend less time doing sports and activities outside, and they eat unhealthier food than they did in the past. Some people today are worried that young people do not have healthy lifestyles. In this essay, I will explain two problems with young people's lifestyles today and suggest some ways to improve their health.

The first problem with young people's lifestyles is that they spend a lot of time indoors. In the past, young people spent more time outside, doing activities such as riding bicycles and playing sports. Today, however, many young people have to do a lot more work at school and homework at home. Furthermore, young people now prefer to spend their free time watching television or sitting in front of their computer screens. This means that they get less exercise, and spend less time outside. I think this is a problem, because exercise is good for both the body and the mind. Young people will not only feel healthier if they do regular exercise, they will also feel happier and more relaxed. Therefore, I think that young people should have the chance to do a variety of different kinds of exercise at school and in their free time.

The second problem is that many young people eat less healthy food than they did in the past. Instead of eating healthy food cooked at home, many teenagers now prefer to eat fast food, such as burgers, kebabs and pizzas. Also, fizzy drinks with lots of sugar, such as cola, have become very popular and many young people have these drinks instead of drinking water. This is a problem because if people have bad eating habits when they are young, they are more likely to eat unhealthy food as adults. In my opinion, parents need to make sure that their children don't eat fast food or drink fizzy drinks with lots of sugar too often and also need to teach them how to cook healthy meals. They should also make sure their children eat plenty of fresh fruit and vegetables, and that they don't eat too much sugar and salt.

In conclusion, young people today do less exercise and eat less healthy food than their parents did in the past. This is a problem because if teenagers develop unhealthy habits when they are young, they will find it difficult to stop the bad habits when they are adults. I think that it is important for young people and their parents to make sure that they eat healthy food and do enough exercise.

**Exercise 9**

**Put the sentences in the correct order to complete the paragraph.**

any people say that they don't have time to exercise, because they are too busy with work, college or school.

For example, if you play a game of volleyball once a week or go for a run together, you will improve your health, and make new friends.

For example, you could walk up the stairs instead of taking the lift, and make sure that you go for a walk during your breaks.

This may take a little bit longer, but you will feel healthier and you will have more energy if you do this every day.

However, there are many ways that we can keep fit for free and without taking time out of our busy days.

Finally, you could try a new sport with your colleagues or classmates.

Secondly, you can be more active while you are at work or college.

Firstly, if you have to make a short journey by bus or car every day, you could try walking or cycling instead.

**Exercise 10: Read the question and Jane's essay. Does she agree or disagree with the question.**

*In the future, teachers will be replaced by computers. Do you agree or disagree with this statement?*

In my opinion, teachers in the future will mainly be replaced by computers. I think we still have teachers for a few lessons, but most lessons will be online.

We will have more lessons from teachers through the internet, but I don't agree that teachers will be replaced completely. I think expert teachers will teach people all around the world at the same time. I don't believe this will change the way we learn or are tested.

Students will always need contact with a teacher, but maybe not in a traditional classroom.

For this reason, I disagree with the statement.
