THE ISLANDS OF JAPAN

Japan is an island country in the Pacific Ocean. It has got 6,852 islands and only 260 are inhabited.

Japan has got 5 main islands. **Honshu** is the biggest and most populous island in Japan. This is where Tokyo and Mount Fuji are located. **Hokkaido** is the second largest of the main islands, it is located at the north of Honshu and is Japan's coldest region. **Kyushu** is the third largest island of Japan, is located south of Honshu and it has got Japan's most active volcano. The fourth largest island of Japan is **Shikoku**. It is located between Kyushu and Honshu island. **Okinawa** is the smallest of the five main islands of Japan. It is situated south and far from Honshu and is Japan's tropical island.

QUESTION TIME!
