Robotic science has revolutionised the way people live,

1)  and entertain themselves. Nowadays, there are

2)  doing the work that only humans did in the past.

The robot 3)  in this famous Asian restaurant do all the work. They take orders, cook the food and entertain you too! And they only need a 4)  to charge their 5) . But robots have an even more important role in healthcare and emergency situations. Robotic surgery is 6)  and accurate and robotic arms are much 7)  than a surgeon's. Finally, scientists have designed robots to help lifeguards, and ones that are firefighting machines like Saffir, a robot they 8)  to help the US navy in its dangerous missions!

What do you think of the use of robots in modern societies?
