

24. Read the text. Choose the right words and write them on the lines. (8 TEST 3)

Example We live on one of nine planets. The name of our planet is Earth. The other eight planets are Mars, Mercury, Venus, Neptune, Uranus, Pluto, Jupiter and Saturn. The planets are like big balls of rock and metal and they go round the sun. The sun is not a planet, it is a very big star.

1 Jupiter is bigger the other planets and it has got 16 moons. Pluto is the smallest planet, and it is the coldest one because

2 it is very far from the hot sun. Pluto has got one moon. Mercury is the nearest planet to the sun and it is very hot.

3 Our planet Earth is Venus and Mars but they are very

4 far from us. Rockets take very long time to go from one

5 planet to another. Earth is the only planet things grow and people and animals live. Some people think that there are people

6 animals on some of the other planets. No one has

7 ever to the other planets.

8 Perhaps people go to visit the other planets in the

9 future.
