

Application\_Grade-5\_Measurement  
Unit Conversion (Metre and Centimetre)

**Compare the following using  $>$ ,  $<$  or  $=$  sign:**

**Hint:** To compare the measurement of length by cm, m and km, we observe that  $\text{cm} < \text{m} < \text{km}$ .

(i)  $702 \text{ cm} > 503 \text{ cm}$

(ii)  $2 \text{ m} \dots\dots\dots 9 \text{ m}$

(iii)  $800 \text{ cm} \dots\dots\dots 80 \text{ m}$

(iv)  $702 \text{ cm} \dots\dots\dots 5 \text{ m}$

(v)  $8 \text{ cm} \dots\dots\dots 7000 \text{ m}$

(vi)  $625 \text{ cm} \dots\dots\dots 9 \text{ m}$

(vii)  $10 \text{ m} \dots\dots\dots 4 \text{ cm}$

(viii)  $1000 \text{ m} \dots\dots\dots 1000 \text{ m}$

(ix)  $100 \text{ cm} \dots\dots\dots 100 \text{ m}$

(x)  $1 \text{ m} \dots\dots\dots 1000 \text{ m}$
