

REVISION : Unseen Passage

After the floods, diseases caused by flies & mosquitoes spread rapidly- like malaria, cholera etc. These are caused by micro germs - like virus, bacteria & protozoan. The stagnant flood water becomes a fertile ground for birth and growth of mosquito larvae as well as safe home of germs. It means flies, mosquitoes are germs-carrier only and not a root- cause of water-borne diseases.

Moreover, such diseases can turn into severe problem, if it's carrier grow fast. Consequently, it's intensity multiplies if we won't control the water potholes. Besides this, consumption of contaminated water through raw veggies, fruits, salads and frequently eaten roadside foods gave easy passage to germs in our stomach & internal food pipe.

Read the passage and answer the following -

1. Choose the sentences 'true' or 'false' (T/F)-
