Directions: Read the scenario and answer the questions below.

You are interested in buying a new smartphone. Sally is the owner of Phoney's, a cell phone store. You go to Phoney's and talk to Sally, telling her all the features you are looking for in a smart phone. You ask about the iPhone 4S, but Sally talks you out of it and you get something else instead. Later, you find out that Phoney's doesn't carry iPhones.

_____1. What is the scenario mainly about?

A. Sally sells iPhones.

B. Sally makes bias statements about other phones because she doesn't sell an iPhone.

C. Sally likes other phones than iPhones.

D. Sally convinces the buyer to buy other phones because she loves it.

_____ 2. Which among the statements suggests that there's bias?

A. Sally is the owner of Phoney's, a cell phone store.

B. You go to Phoney's and talk to Sally, telling her all the features you are looking for in a smartphone.

C. You ask about the iPhone 4S, but Sally talks you out of it, and you get something else instead.

D. Later, you find out that Phoney's doesn't carry iPhones.

_____ 3. What makes the statement above biased?

A. Obviously, Sally is biased against phones her store doesn't sell and biased towards the phones that they do.

B. Undeniably, Sally convinces the buyer to buy other phones because the feature of it is more than that of an iPhone.
