- h) particular

**B** Read the small extract from the text and write **(T)** for true statements and **(F)** for false statements.

It is said that dolphins are *intelligent* creatures. They are very sociable. They live in *groups*. They are *similar* to humans. Dolphins use a *strategy* to get their food. They *help* fishermen. They send signals to the fishermen when there are fish in the water. They use a system of sounds and body language to *communicate*. Like humans, dolphins choose their name themselves. Dolphins like to talk to each other about all sorts of things – such as their age, their feelings, and finding food.

1. Dolphins are smart creatures.
2. Dolphins send signals to the fishermen to put their nets in the water.
3. They never join other pods.
4. The scientists choose their name with a whistle.
5. They use sounds to communicate.
6. Dolphins are different from humans.
7. Dolphins like to talk to each other.
