

PLANTS: PART OF A PLANT

1) Read and label the words.

Plants are living things. They are born, grow, reproduce and die. They need **water, minerals, air and sunlight**. They make their own food. They can't move around. They can move one or more of their parts. They have got **roots, stem, leaves and flowers**.

PARTS OF A PLANT
(PARTES DE UNA PLANTA)

minerals

sunlight

air

water

roots

leaves

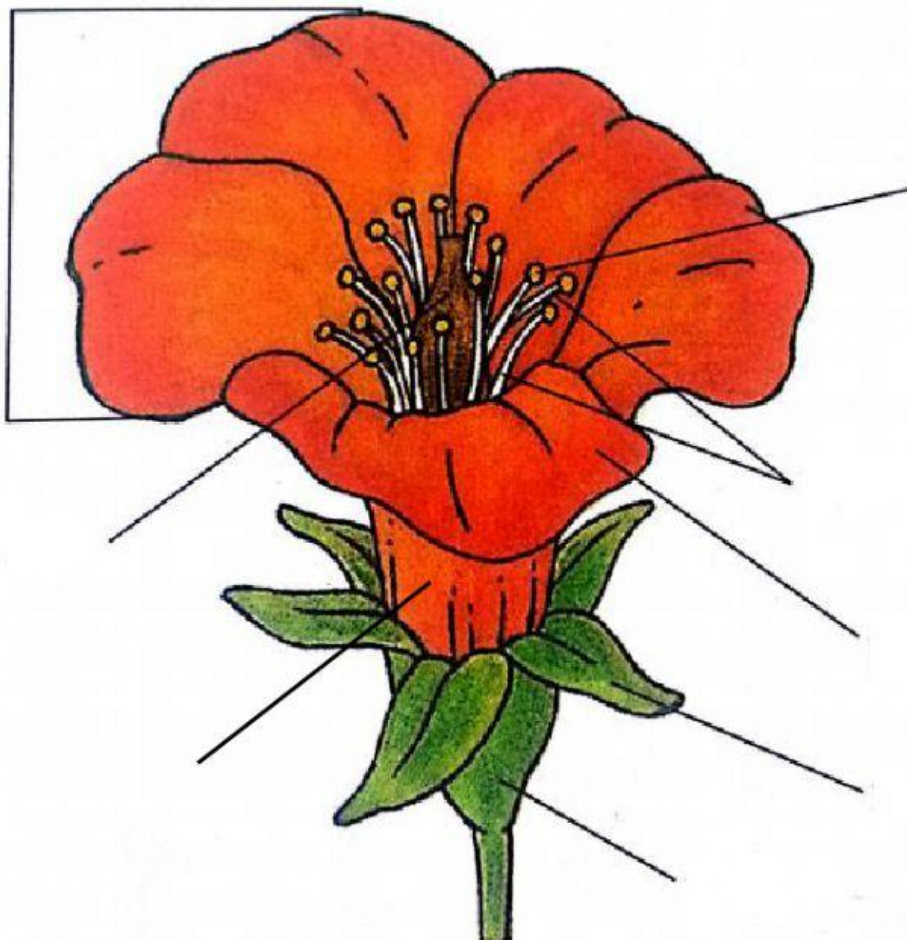

stem

flower

PARTS OF A FLOWER

Some plants have flowers. All flowers have the same parts. The **corolla** is made of **petals**. The **pistil** is the female reproductive organ. It has **ovules** inside. The **stamens** are the male reproductive organs. They have **pollen** at the top. The **calyx** is made of **sepals**. Sepals are green.

The parts of a flower

corolla	petals	pistil	ovules
stamens	pollen	calyx	sepals
