## Use of English

9 Choose the correct answers (a–c) to complete the text.

Jet lag is a problem experienced after a long-haul flight. It occurs when people cross a number of time zones, disrupting their natural body clock <sup>1</sup> a while. One of <sup>2</sup> common symptoms is a disturbed sleep pattern, which means that they may want to sleep during the day <sup>3</sup> first. <sup>4</sup> confused and disoriented is another symptom. It usually takes one or two days to get the body clock <sup>5</sup> control again, although some people adjust to jet lag more <sup>6</sup> than others. The symptoms are usually <sup>7</sup> worse when going from west to east, because some time is lost during the journey, making the day of arrival <sup>8</sup>. This causes problems for travellers, who would sooner <sup>9</sup> sleep than try to force it. In general, the more time zones that are crossed, <sup>10</sup> severe the jet lag can become.
