

OTHER CELESTIAL BODIES

There are other celestial bodies that orbit around the Sun:

- **Comets:** they are made of ice and rocks.
- **Asteroids:** they are giant rocks. When they fall to Earth they are called meteorites.

1. Read the sentences and write TRUE or FALSE.

- Asteroids are made of ice and rocks.
- Planets orbit around satellites.
- Stars have their own light.
- Planets follow a path called celestial body.
- Stars orbit around planets.
