

DOLPHIN FACTS

Watch the video and fill in the blanks.

In this video, we are going to learn about _____. It's dolphins time. The first thing we want to learn about dolphins is that dolphins are _____ that spend their lives in the _____. Here are just _____ of the reasons why we consider dolphins are mammals. The first reason we're gonna share is that the breeze _____. It's true. They breeze air. _____ breathe through gills but dolphins have to _____ to the surface to breathe air and they use their _____ to breathe air just like we do. Also, _____ produce milk for their young. Fish don't do that. That's something mammals do. So dolphins are definitely mammals because their mothers produce _____ for their young.

Dolphins are also _____ blooded like other mammals and they're not _____ blooded like fish are. So dolphins are aquatic _____. It's pretty awesome.

This is _____. A group of dolphins is called a "pod" or a "_____". Do you recognize that term "school". Now this is _____. You could really impress a lot of people by sharing this

_____ with them. Did you know male dolphins are called "_____"? They're called bulls. It gets even more strange. You see female dolphins are called "_____". uh-huh? Haha. And _____ dolphins are called calves. You may say "Why? What the reason?".

Something you might not realize about dolphins is just how _____ they are. Their _____ are huge for the size of their bodies. And they just have a lot going on. They're really, really, really smart. Dolphins are not only smart. They're also incredibly _____ and they're capable of _____ with other creatures. To empathize means to _____ and share the feelings of someone else...
