Understand solid shapes and their motion

Application _ Solid Shapes

There are 6 mystery shapes on the right. Read each riddle below and write the name of the mystery shape.

1 I have 6 faces. 2 of my faces are square. 4 of my faces are rectangles that are not squares.

I am the _____.

cube

2 I have no faces at all. I am round all the way around.

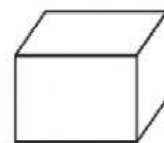

I am the _____.

pyramid

3 I have 5 faces, but you can only see 2 of them. 4 of my faces are triangles. They meet at one point called a vertex.

I am the _____.

rectangular prism

4 Two of my faces are circles. If you set me on one of those faces, I will not roll.

I am the _____.

sphere

5 I have 5 faces. 3 of my faces are rectangles. 2 of my faces are triangles.

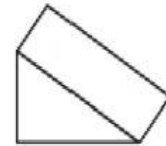

I am the _____.

cylinder

6 I have 6 faces. All my edges are exactly the same length.

I am the _____.

triangular prism
