

# Rainfall and Biomes

Match each characteristic with the correct biome. You have to write only the number of the characteristic. Write them in order from lower to higher.

<b>1</b>  Many flowering shrubs and trees.	<b>2</b>  Plants that survive with little water.	<b>3</b>  More rain than the desert, less than the forest.	<b>4</b>  Mild temperature.
<b>5</b>  Very wet environments.	<b>6</b>  Plants with long roots to absorb and store water.	<b>7</b>  High temperature.	<b>8</b>  Also known as prairie. Covered in grass and flowers but few trees.
<b>9</b>  Rainy weather. More than 250 cm of rain each year.	<b>10</b>  Animals live with very little water due to their scaly skin.	<b>11</b>  Rain and snow throughout the year.	<b>12</b>  Very little rain.
<b>13</b>  Hot and dry summers and cold winters.	<b>14</b>  The tallest trees in the world, especially evergreen.	<b>15</b>  Large leaves of flowers help to absorb the small amount of sunlight that reaches the forest floor.	<b>16</b>  Most trees are deciduous (lose their leaves in fall and produce new ones in spring).
